

NATIONAL *IN SITU* LANDRACE INVENTORY

# Database for Landrace information recording Manual

The aim of the manual is to provide specific indications on how to use the PGR Secure database

## NATIONAL *IN SITU* LANDRACE INVENTORY

- use the tool to add an unlimited number of accessions
- the tool has been developed and tested for MS Access version 2003/2007/2010. For previous versions it may not work

## NATIONAL *IN SITU* LANDRACE INVENTORY

- click on ENTER THE DATABASE to enter, if the database is not active, it is necessary to activate the macro VBA protection alert (see figures shown below at pages 6-8)
- click ADD to add a new record (accession) to the database
- click DELETE to delete a current record from the database

## NATIONAL *IN SITU* LANDRACE INVENTORY

- click BACK and/or NEXT to return to a previous record or to go to the next record
- click FIND to find key words in specific fields
- in the fields "data" which allow for multiple choice, a box shows the codes you have selected

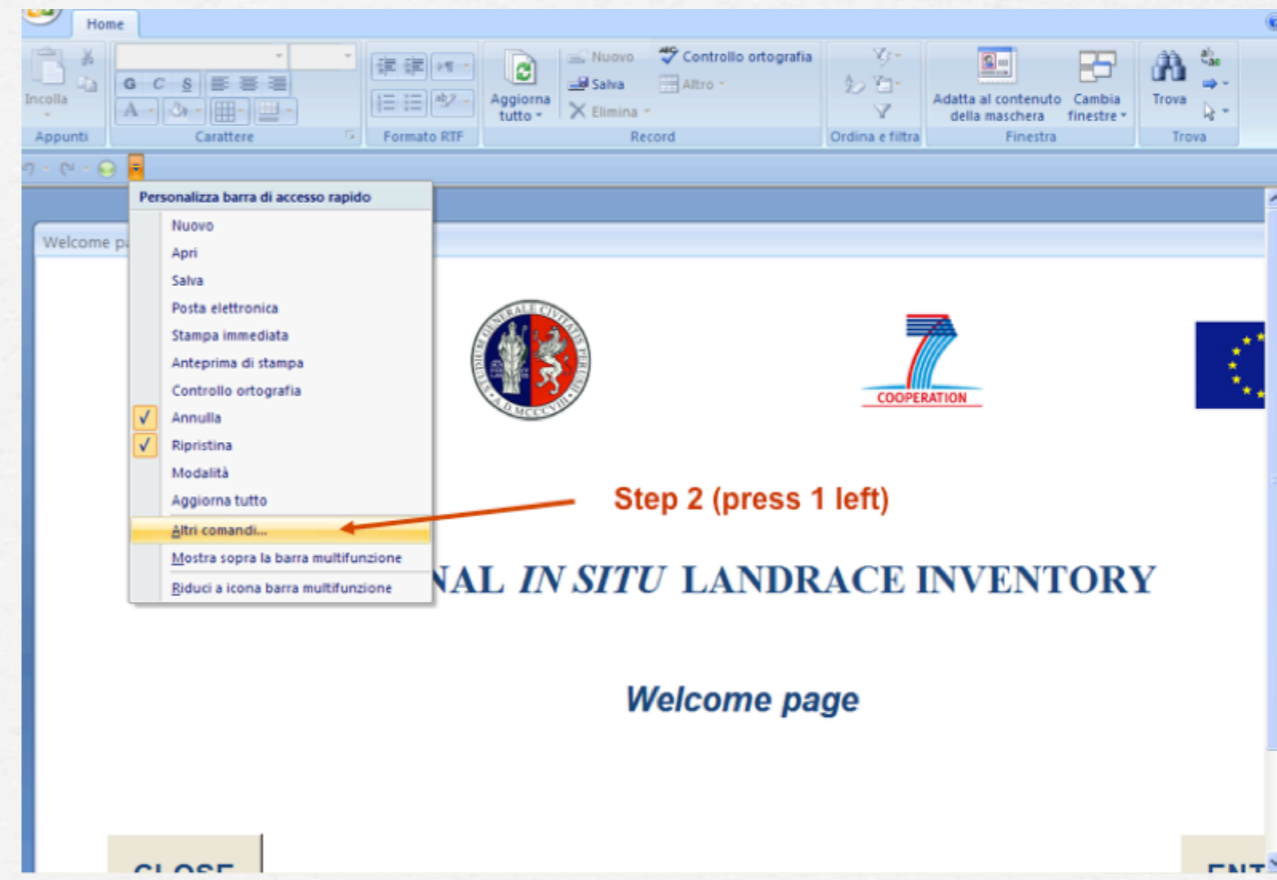

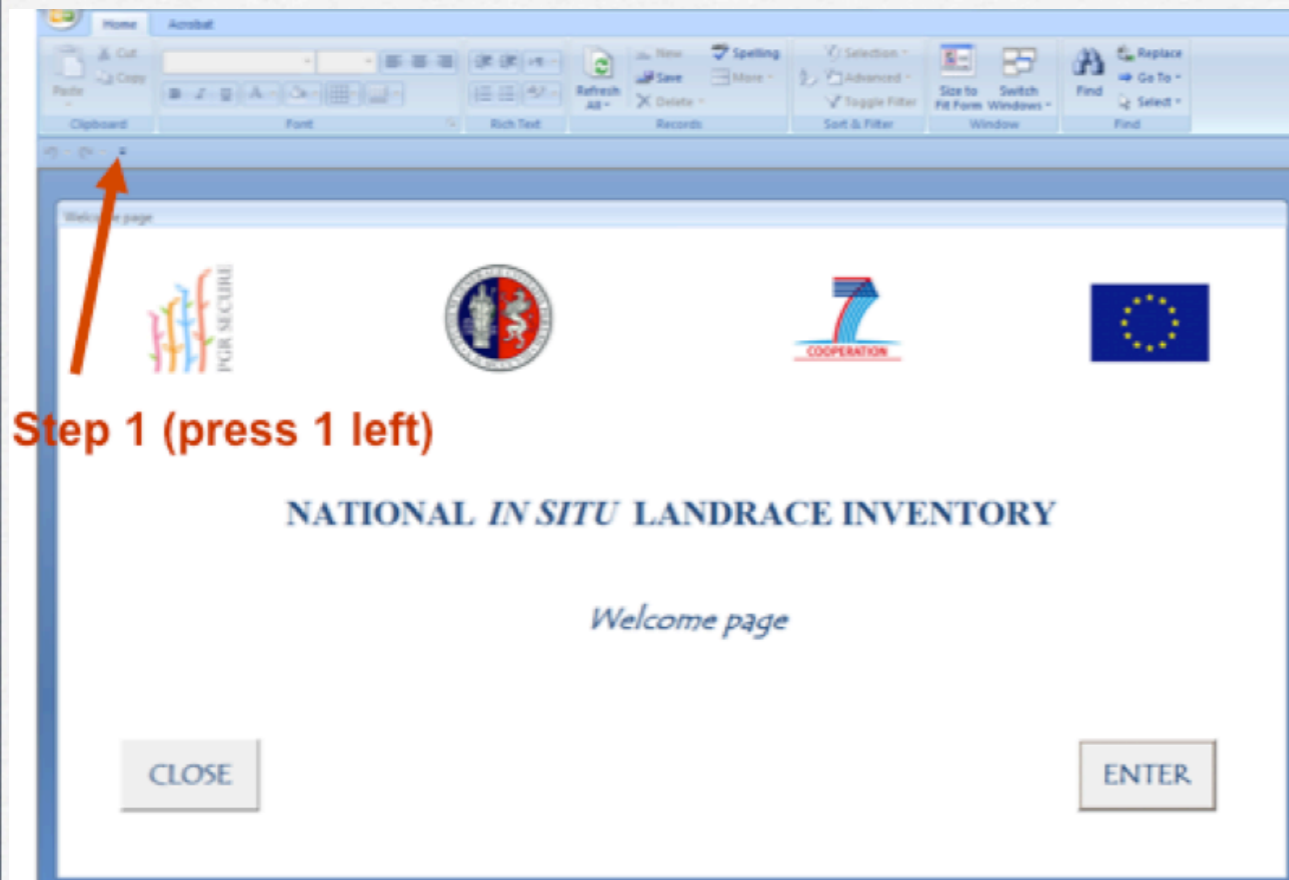

## NATIONAL *IN SITU* LANDRACE INVENTORY

- click EXIT to exit correctly from the database
- data are saved automatically, but all data can be modified/integrated by using the BACK key
