Italian Society of Vegetation Science (SISV) 54th Congress (virtual Conference)

September 28th-29th 2021

INTERNATIONAL CONGRESS

The 54th Congress of the Italian Society for vegetation Science was set to be held in June 2020 at the Faculty of Architecture of the University of Rome. The explosion of the COVID-19 pandemic in the spring of last year led first to move the congress to October 2020 and then definitively to 2021. However, the persistence of the serious situation of COVID-19 infections in Europe during these first months of 2021 and the uncertainty about the results of the current vaccination campaign does not allow us to plan a “face to face” congress as we had planned it. The SISV 2021 congress will therefore be carried out as a virtual conference.

SISV 2021 virtual conference September 28th-29th 2021

Twenty years in the third millennium with Vegetation Science

From the identification and description of plant communities to the production and interpretation of large-scale syntaxonomic frameworks. Forest ecosystems, Habitat directive and Green Infrastructures.
